Shortcuts & tips

Common questions

Troika Handbook

Everything you can do in the Troika music-lessons app, in plain words. Find your role in the menu, or jump to a task. Steps use **this style** for buttons and menus you tap.

Getting started

Signing in & who can do what

There are three kinds of accounts. What you see depends on your role.

- 1 Open the app and sign in with Google or your email.
- 2 First time only: pick whether you're a **Teacher** or a **Student**. (Coordinators are set up by the office.)
- 3 New teacher and student accounts wait for a coordinator to approve them. You'll see an "Account pending approval" screen until then.

Coordinator

Runs the school — students, schedules, money, everything.

Teacher

Sees their own classes, marks attendance, tracks pieces.

Student / Parent

Sees lessons, calendar, payments and invoices.

Finding your way around

- 1 The **left sidebar** is your menu. Your name and role sit at the bottom.
- 2 Press **⌘ K** (Mac) or **Ctrl K** (Windows) anywhere to **search** — jump to any page, or type a student's name to open them.
- 3 Use the **sun/moon** button (top-right) to switch between light and dark. The app starts in light mode.

Students

Add a student

- 1 Go to **Students** in the sidebar.
- 2 Click **Add student** and fill in name, contact and parent details.
- 3 Save. The student now appears in the list and can be enrolled in classes.

Tip: If a student signs up themselves with the same email, their login links automatically to the record you created — no double entry.

Edit, instruments, activate/deactivate

- 1 Click a student's name to open their page.
- 2 Click **Edit** to change contact details, parent info, location and notes.
- 3 Under **Instruments / Subjects**, tap the chips to add or remove what they learn. Changes save as you tap.
- 4 Use **Deactivate** to hide a student who has left (nothing is deleted); **Reactivate** brings them back.

Enrolling a student & multiple classes

Enrol a student in a class

Enrolling sets the fee plan, creates the weekly slot, and generates all the lessons.

- 1 Go to **Enrolments** → **New Enrolment** (or open a student and click **New enrolment**).
- 2 Pick the **student** , then the **lesson rate** for the class. The rate fills in automatically — you can type a different amount for this student if needed.
- 3 Choose the **payment plan** (1, 3 or 10 instalments) and a **discount** if any (see below).
- 4 Pick or create the weekly **schedule slot** (day, time, teacher, instrument).
- 5 Click **Save & Generate Lessons** . The lessons and payment instalments are created.

Adding several instruments (Guitar + Violin + Voice...)

A student can take as many classes as they like — each is its own enrolment.

- 1 After you save the first class, click **+ Add another class for [name]** .
- 2 The student stays selected — just pick the next instrument's rate and slot, and save again.
- 3 Repeat for each class, then click **Done** . Each class shows as its own card on the student's page (e.g. "Guitar · 2026", "Violin · 2026").

How discounts work

Pick *one* main discount, and optionally add the multi-lesson one on top.

- **Plan discount** — automatic from the plan (1 instalment = 10% off, 3 = 5%, 10 = 0%).
- **Legacy student** — 25% off, for long-standing students.
- **Flat ₹ special** — a fixed rupee amount you type in.
- **Multi-lesson (+5%)** — a tick-box that stacks on top of any of the above.

Discounts apply to tuition only, never to the registration fee.

COORDINATOR

Schedule & lessons

View and add lessons

- 1 Go to **Schedule**. Switch between **Day** and **Week** views, and filter by teacher or instrument.
- 2 Click **Add lesson** to create a one-off lesson (regular, makeup, demo, workshop or special) with its own fee options.
- 3 Recurring weekly classes come from enrolments and from **Teacher Schedules**.

Mark a lesson done, or cancel it

- 1 In **Day** view, click a lesson to expand it.
- 2 Click **Mark completed** when the lesson has happened — this counts it toward the student's lesson total. **Reopen** undoes it.
- 3 Click **Cancel this lesson** and give a reason. The student is notified automatically.

Important: lesson counts, "lessons remaining" and reports only move once lessons are marked **completed** (by you or the teacher). Get into the habit of ticking them off.

Attendance & charged absences

Mark who attended

- 1 Open a student's page and find the lesson in their history.
- 2 Mark **Attended** , or mark an **Absence** and choose **Charged** or **Not charged** .
- 3 A **charged** absence uses up one of the student's paid lessons (and makes them eligible for a makeup); **not charged** does not.

Find a makeup slot

- 1 On the **Schedule** , expand a lesson and click **Find makeup** for a student.
- 2 The app suggests students at the same location with charged absences, so you can pair up a makeup.

COORDINATOR

Breaks & rescheduling

Schedule a holiday break

- 1 Go to **Breaks** → **New Break**.
- 2 Set the dates and choose all students or specific ones. Preview shows how many lessons it affects.
- 3 Create it — covered lessons are cancelled and marked for reschedule.
- 4 Use **Auto-Reschedule** to have the app find open slots for makeup lessons, or reschedule each one by hand.

On the Schedule, a student who's on a break shows their slot greyed out — a reminder the time is only temporarily free.

COORDINATOR

Payments & invoices

Record a payment & send the invoice

- 1 Go to **Payments**. Rows are grouped into Overdue, Upcoming and Paid.
- 2 When money comes in, click **Mark Paid** on that instalment. An invoice is generated automatically.
- 3 If the invoice ever fails to generate, the payment is still saved as paid and a **Generate invoice** button appears to retry.
- 4 Use the **WhatsApp** button on a row to open a ready-made reminder message with the amount and invoice link.

COORDINATOR

Extra (miscellaneous) charges

Add a one-off charge

For recital tickets, books, exam fees and anything outside tuition.

- 1 On the **Payments** page, click **Add charge**.
- 2 Pick the student, type a name (e.g. "Recital tickets"), the amount and a due date.
- 3 Save. It appears in Payments like any other item, and gets its own invoice when marked paid.

COORDINATOR

Lesson rates & locations

Lesson Rates

- 1 Go to **Lesson Rates**.
- 2 Pick a teacher, then type the price for each category / location. It saves as you type.
- 3 These prices fill in automatically when you enrol a student (and you can still override per student).

Locations

- 1 Go to **Locations**.
- 2 Add, rename or remove places (Online, Links, Edvin, a home...).
- 3 They then appear in every location dropdown across the app.

Curriculum library

Add teaching resources

- 1 Go to **Curriculum**.
- 2 Upload a curriculum spreadsheet to import pieces, exercises and activities in bulk.
- 3 Teachers can then search and use these when tracking student progress.

Reports & exporting data

See the numbers & download a spreadsheet

- 1 Go to **Reports**. The cards show revenue collected, lessons delivered, lessons attended and total absences.
- 2 The table lists every student with lessons attended, absences, dues collected and outstanding — sorted so the most-active students are on top.
- 3 Click **Export CSV** to download it all (with a totals row) and sort or chart it in Excel / Google Sheets.

Your teaching day

Schedule, attendance & completion

- 1 Open **Schedule** (day) or **Calendar** (month) to see your classes.
- 2 For each student, tap **Present** or **Absent**.
- 3 Tap the tick to mark a lesson **Completed**. Once everyone is marked, it completes automatically.

Repertoire, notes & materials

- 1 Open a lesson and use **Pieces** to add repertoire and move each piece through Not started → In progress → Completed.
- 2 Add a short **note** for the lesson.
- 3 Upload a recording or photo of sheet music to the lesson.
- 4 Use **Curriculum** to search the shared library of pieces and exercises.

Your portal

Lessons, calendar & payments

- 1 **Home** shows your next lesson and a quick summary.
- 2 **My Lessons** lists upcoming and past lessons with attendance; a cancelled lesson shows a "Cancelled" tag.
- 3 **Calendar** shows the month at a glance.
- 4 **Payments** shows what's due and paid. Tap the invoice number to **download** your invoice.

The bell (top-right) shows notifications — payment reminders and lesson cancellations.

Shortcuts & tips

 **K** / **Ctrl** **K**

Search & jump anywhere — pages and students.

Light / dark

Sun/moon button, top-right. Starts light; your choice is remembered.

Add another class

Enrol a student in several instruments without re-picking them.

Mark completed

The habit that keeps every count and report accurate.

Common questions

A student's lesson calendar is empty

They probably have no lessons generated yet. Enrol them through the **Enrolments** page — that creates their schedule and lessons. (Simply adding a student does not.)

"Lessons remaining" or reports show zero

Lessons must be marked **completed** to count. Ask teachers to tick them off, or do it on the Schedule day view.

A number of lessons per year looks off

The annual lesson count is set automatically from the month a student joins (Jan = 39, tapering to December). It's meant to reduce admin — no need to type it.

Troika Music Lessons — internal handbook. Screens and steps match the current app; if a button has moved, the nearest matching label is what to look for.
